UMKa314

The first 4G tracker from GLONASSSoft!

Advantages:

- ✓ 4G networks support
- ✓ MyLogic programming system
- ✓ RS-485 interface
- ✓ External antennas (option)
- ✓ Intelligent power management system
- ✓ Built-in battery
- ✓ Ability to connect up to 3 FLS
- ✓ Ability to send data to multiple servers at once
- ✓ Password protection of the tracker and SIM-card from unauthorized management
- ✓ PCT Certificate
- ✓ Shock-resistant housing of our own design, easy mounting

Specifications:

Number of GLONASS/GPS receiver channels	64
Communication standard	GSM 900/1800 и LTE-FDD B1/B3/B5/B7/B8/B20
Analog inputs	1
Digital inputs	2
Discrete outputs	1
Interfaces	RS-485(опция), Bluetooth*
Black box size up to	10,000 entries
Number of SIM cards	2
Management	SMS*, GPRS, Bluetooth
Antennas	Built-in/External*
Built-in battery	250mAh
Accelerometer	yes
Intelligent power management	yes
Overall dimensions (including mounting)	90x71x26 mm
Weight no more, g	95
Protection degree	IP54
